Coordinating NECB Design Professional Name

Note: The Energy Code Regulations specifies the Energy Performance Tier from NECB Part 10 that must be met as the minimum level of performance. While 'Tier 1' is in force, the Prescriptive compliance path continues to be accepted by *Muni*Code Services Ltd. without the need for a formal 'Alternative Solution' (Tier 1 from Part 10 is equal to the prescriptive requirements of NECB). However, when higher Tiers are in force, this Prescriptive Report may only be used for alteration applications in order to demonstrate continued compliance for NECB Parts that had been previously modeled on prescriptive assumptions (see NECB Sentence 10.1.1.2.(2)).

Part 3 – Building Envelope							
For Additions: fenestration is being calculated for (edge on):	□ Addition only						
	nbined						
General		Proposed	Proposed NECB Lim				
	Gross wall area (m ²)		N/A				
	Total window area (m ²)		N/A				
Т		N/A					
	Gross roof area (m ²)		N/A				
		< 0.02 x (gross roof area)					
		N/A					
			HDD @ 18º	HDD @ 15º			
Overall Thermal Transmittance – U (W/(m ² ·K))	FDWR (%)		≤	≤			
Op	aque walls (above ground)		≤ 0.215	≤ 0.240			
Opaque wa	Ils (in contact with ground)		≤ 0.284	≤ 0.284			
	Roofs (above ground)		≤ 0.121	≤ 0.138			
Roc	ofs (in contact with ground)		≤ 0.284	≤ 0.284			
	Floors (above ground)		≤ 0.138	≤ 0.156			
Air Leakage (L/(s·m ²)) Floo	ors (in contact with ground)		≤ 0.757 for 1.2m	≤ 0.757 for 1.2m			
Fixed fer	estration and curtain walls		≤ (.20			
Operable win		≤ 0.5					
		≤ 2					
Operable revolv		≤	5				

Part 4 – Lighting					
Proposed building IILP (Installed Interior Lighting Power) (kW) (not to exceed the ILPA below)					
Interior Lighting Power Method: (Select One Below)					
□ ILPA (Interior Lighting Power Allowance - building area method)					
Lighting power density (W/m ²)					
OR Gross lighted Area (m ²)					
Proposed ILPA building area method (kW)					
ILPA (Interior Lighting Power Allowance – space-by-space method)**					
**Provide a detailed line-by-line breakdown of spaces, their floor area (m ²), the associated lighting power densities (W/m ²) and the resulting lighting power allowances (kW) & controls					
Proposed ILPA space-by-space method (kW)					

Exterior Lighting	Power: (all values below to be in Watts)		
Specific Lighting {Table 4.2.3.1-C} (I	g Allowance + Portion of Basic Site Allowance = f multiple specific applications used in design, provide a table showing all}	Specific Total Exterior 2	Specific Installed Lighting
Sum of General Lig {Table 4.2.3.1-D}	hting Allowances + Remaining Basic Allowance =	General Total Exterior >	General Installed Lighting
Other Exterior Light {Table 4.2.3.1-E}	Other Installed Lighting		
	Total Exterior Lighting Installed		
	□ Yes □ No		
	□ Yes □ No		
	□ Yes □ No		
	□ Yes □ No		

Part 5 – Heating, Ventilating and Air-Conditioning Systems							
				Proposed		NECB Limit	
				Constant Volume	Variable Air Volume	Constant Volume	Variable Air Volume
	(W/L/s))			≤ 1.6	≤ 2.65		
						□< 1410 L/s	
Commercial kitchen design ventilation rate (L/s)						Demand control provided	
Ducts sealed, insulated, and protected in conformance with Subsection 5.2.2. Intakes and outlets conform with Subsection 5.2.4.				□ Yes	□ No		
	Economizer system requi	red in conformance with Articles	5.2.2.7.	\Box Yes	□ No		
Air economizer has been designed to Article 5.2.2.8.□ or Article 5.2.2.9.□ (pick one)					🗆 No		
Insulation and protection of piping systems for HVAC systems in conformance with Subsection 5.2.5.				□ Yes	□ No		
Temperature controls been designed in conformance with Subsection 5.2.8.				□ Yes	🗆 No		
Type of ventilation system operation				Continuous Non-continuous			
Percentage of outdoor air at design airflow conditions (%)							
Energy recovery system required			required	□ Yes	🗆 No		
Energy recovery system efficiency (%)							
Please provide details of proposed HVAC equipment and component specifications for the building, using the table below: (Please note if more space is needed, please submit a separate list using the same format) Table 5.2.12.1							
Component or Equipment	Cooling or Heating Capacity, kW	Standard	Rati	Rating Conditions Per			ce Rating

Part 6 – Service Water Systems									
						Propo	osed		NECB Limit
Shower heads (L/min)					in)			≤7.	6 L/min
Lavatories (L/min)						≤ P ≤ P	rivate 5.7 L/min ublic 1.9 L/min		
	Service water piping insulated in conformance with Subsection 6.2.3 Service No								
Please provide d (Please note if m	Please provide details of the proposed service water heating equipment specifications for the building, using the table below: (Please note if more space is needed, please submit a separate list using the same format) Table 6.2.2.1.								
Component or Equipment	Input	Capacity (L)	Vt (L)	Input/V _t (W/L)	St	andard	Ratii Condit	ng ions	Rated Performance

Part 7 – Power Systems		
	Proposed	NECB Limit
Load carrying capacity (kVA)		□< 250 kVA
		Monitoring system provided
Compliance Confirmation		
Effective thermal transmittance including the effects of thermal bridging has been calculated as per Article 3.1.1.7	S □ Yes	□ No
The building envelope meets air leakage requirements from Article 3.2.4.1	□ Yes	□ No
Building energy prescriptive compliance meets NECB 2020	D 🗆 Yes	□ No
